Topics of the laboratory classes

Not provided by the curriculum

Self-study

Self-study work includes studying the lecture material and independent study of topics and issues that are not covered in lecture classes.

Self-study involves completing an individual assignment in the form of an essay (abstract), the topic of which is freely chosen from among the topics offered. Students conduct a bibliographic search, draw up an essay plan, or pose questions that need to be answered with reasoned arguments, having mastered the sources on the topic. The essay should have the following structure: title page, table of contents, introduction, main body (2-3 chapters), conclusion, and list of sources and references. The introduction should justify the relevance of the topic, indicate the object, subject, chronological and territorial boundaries of the research, the purpose and objectives of the work. A mandatory part of the introduction is a brief analysis of the scientific literature used in writing the essay. The main body consists of sections, each of which has its own title and corresponding numbering. The sections should be arranged in a logical sequence. The conclusion should summarize the main results of the study. The list of references should be compiled in accordance with the rules of bibliography. The total volume of the abstract is 10-14 pages printed in Times New Roman font (font size - 14; line spacing - 1.5; margins - 2.5) The language of the essay is Ukrainian. Avoid long sentences, verbosity, repetition, and analysis of unimportant facts. You should check the text for grammatical, stylistic, or other errors. The presentation of the essay is possible only after the teacher has checked the text of the work. The presentation of the essay may be accompanied by a multimedia presentation. The volume of the presentation is up to 10 slides, the main content of the presentation is presented in a free form at the seminar.
