

National Technical University
«Kharkiv Polytechnic Institute»

Software Engineering and
Management Intelligent
Technologies Department

SEMiT

**Leader among technical universities in Ukraine
in The Times Higher Education Impact
Rankings 2025**

**In the TOP-5 best Ukrainian universities
in the QS WUR 2026 world ranking**

Cooperation Proposal

NTU "KhPI", Kharkiv, 2025

Who We Are

The department was founded more than 60 years ago by Professor Areg Dabagyan in 1964. Our path:

- **1964** - Automatic control movement, majoring in flight dynamics
- **1977** - Computer-aided control systems, majoring in computer science and computer-aided systems software
- **2015** - Software engineering and management intelligent technologies, majoring in software engineering, computer science and intelligent systems

Our Team

Our team includes scholars, researchers, post-docs, and assistants who inspire students to achieve their goals!

- **41** teachers: **5** D.Sc., **29** Ph.D., **7** instructors and assistants
- **27** English-speaking teachers (B2+)
- **14** engineers and methodologists

Teaching

We provide study programs at Bachelor, Master, and PhD academic levels in:

- **Software engineering**
- **Computer science and intelligent systems**

Bachelor programs are **internationally accredited by German ZEvA agency**

During the academic year we train:

- **700+** bachelor students
- **150+** master students
- **20+** doctoral students

Research

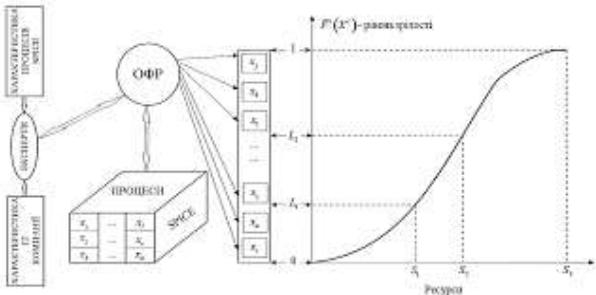

Our **core research directions** include but not limited to the following topics:

- Quality management of software development processes
- Intelligent monitoring of real-time data in control systems
- Development of integrated software complexes for solving problems in the field of software engineering and IT education
- Analysis and synthesis of complex systems
- Management of dynamic systems under conditions of uncertainty

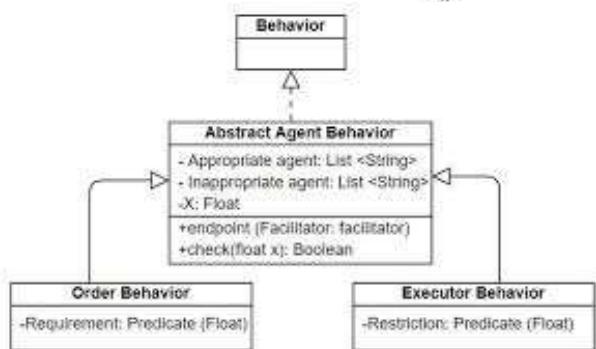

Our R&D Projects 1/3

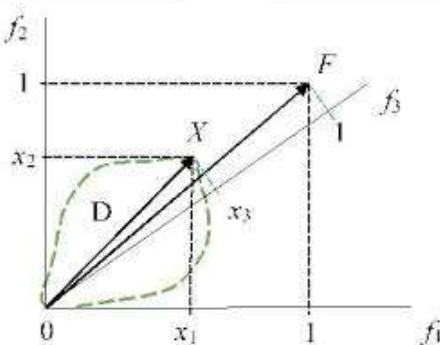

**Models, algorithms and information technology
for planning the development of the software
fulfilment process based on the SPICE INT
model**

Supervisor: Prof. Mykhailo Godlevskyi

**Development of methods for intelligent
monitoring of relevant data in management
systems**

Supervisor: Prof. Olga Cherednichenko

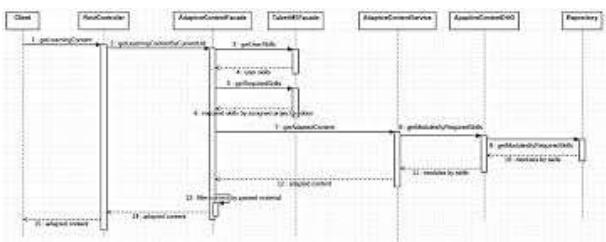

**Development of software solutions for
improving the efficiency of managing parallel
processes**

Supervisor: Prof. Serhii Shevchenko

Our R&D Projects 2/3

Software development methods and tools for IT companies personnel training using corporate knowledge

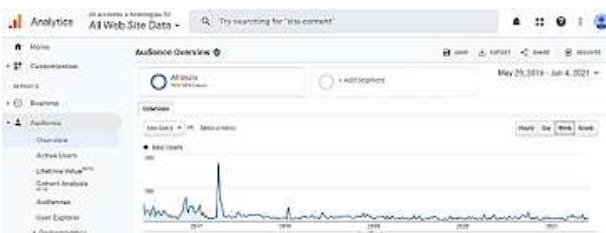

Supervisor(s): Associate Profs. Volodymyr Sokol, Mariia Bilova

Development of a set of models for dynamic systems management under uncertain conditions

Supervisor(s): Prof. Valentyna Moskalenko, Associate Prof. Nataliia Fonta

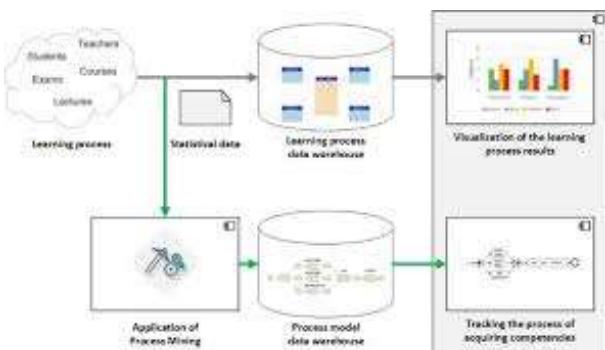

Development of models and methods for collecting and automated processing of business information in the Web

Supervisor: Associate Prof. Serhii Orekhov

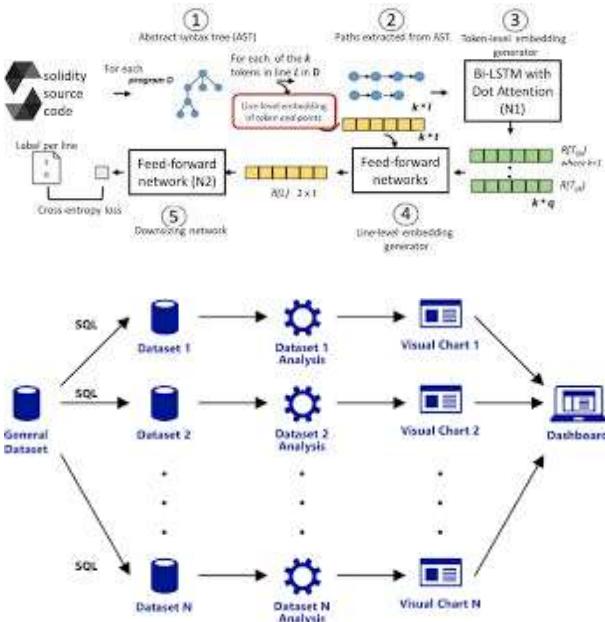

Our R&D Projects 3/3

Models and methods of analysis and synthesis of complex systems

Supervisor(s): Prof. Ihor Hamaiun,
Associate Prof. Oleksandr Shmatko

Development of models, methods and information technologies for evaluating complex multi-attribute objects and systems

Supervisor(s): Associate Profs. Oleksandr Shmatko, Iryna Liutenko

Supervisor(s): Prof. Dmytro Orlovskyi, Associate Prof. Andrii Kopp

Innovation Campus

First project among Ukrainian state universities that combines IT studies and co-working!

- Established in 2019
- First location opened in 2020
- Officially launched in 2022
- **QS-Wharton Reimagine Education Awards 2022 Silver Winner**
- Center for collective use of scientific equipment launched in 2025

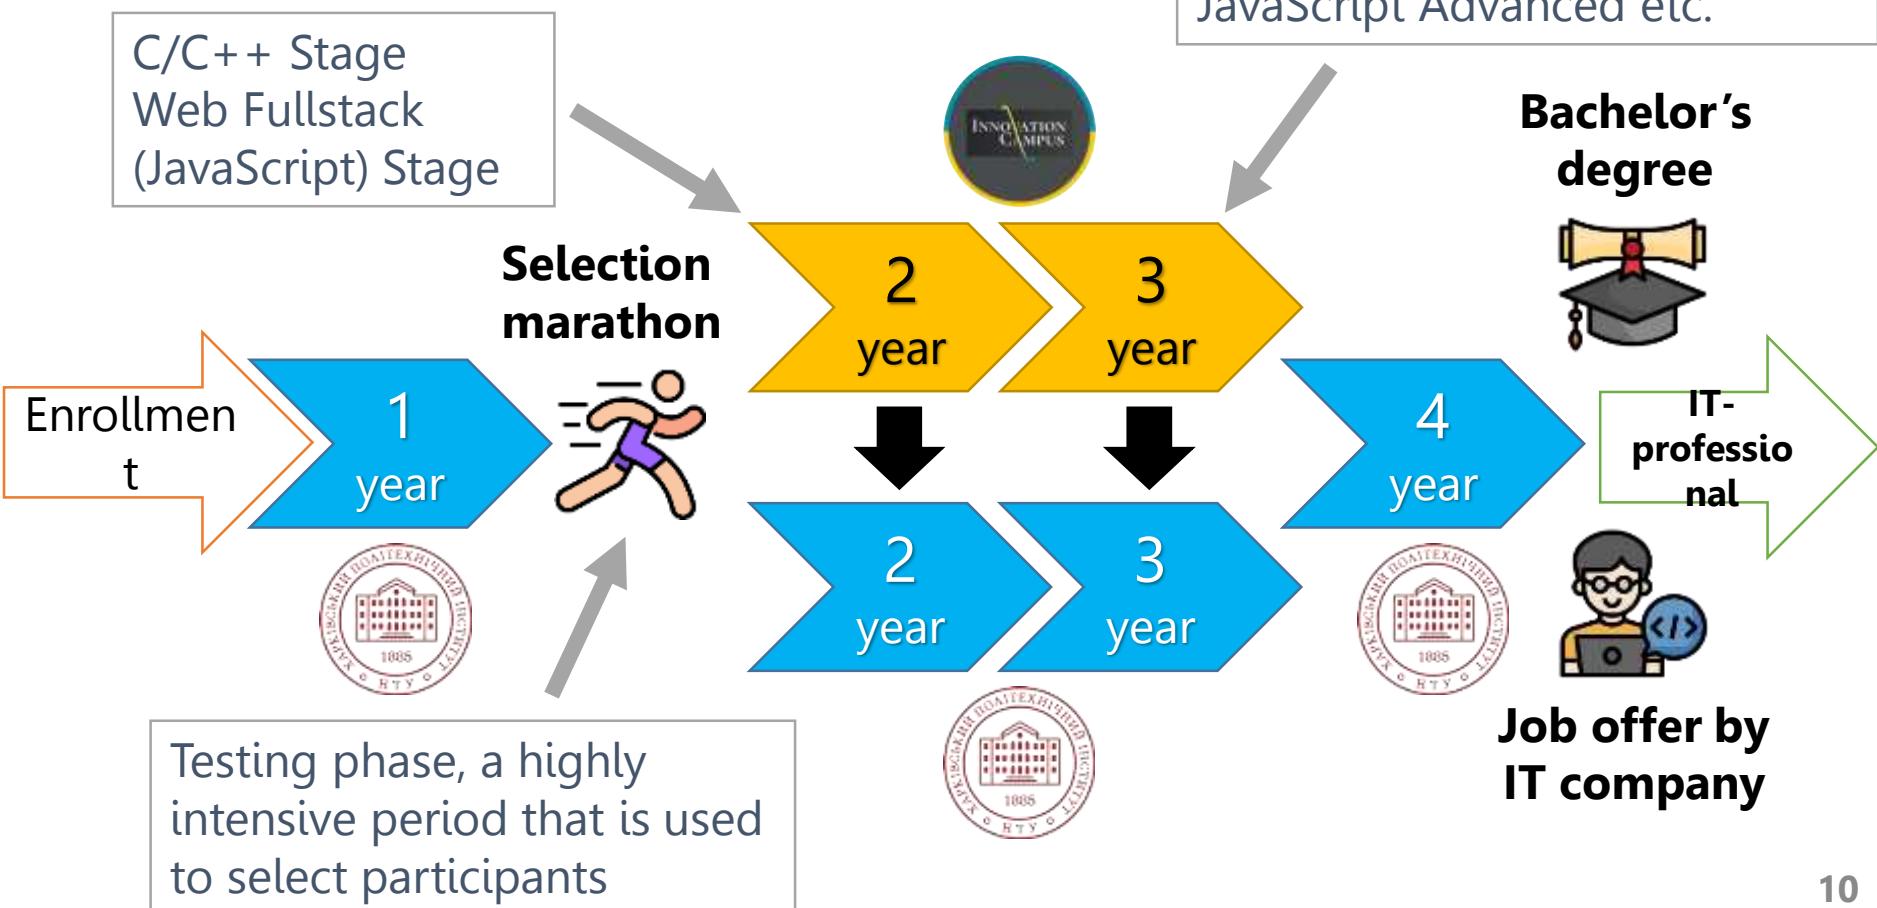

What we can do together:

- **Hardware and software upgrade**
- **Supervision and advisory with leading ICT companies and institutions**

Innovation Campus Program

IT Center Laboratory

Launched in 2001 to **facilitate cooperation with domestic and international scientific and technical partners**, including:

- Conferences and workshops
- Thesis presentation and defenses
- Lectures of invited professors
- Laboratory classes for students
- Meetings of research groups
- Project-based training
- Scientific work and experiments
- Certifications and master-classes

Premises of **67.6 m²** for educational and scientific cooperation ready for deployment.

What we can do together:

- **Joint programs, projects, modules, courses**
- **Hardware and software upgrade**
- **Premises renovation**

Computer Rooms

Premises of **225+ m²** for educational and scientific cooperation ready for deployment.

Under the guidance of our teachers and scholars, students of Bachelor, Master, and PhD programs master:

- Algorithms, Programming, Operating systems, Computer networks, Cloud technologies
- Databases, Web development, Software design, Cybersecurity, Software quality and testing
- Machine learning, Data mining, Deep learning, Intelligent systems, Text mining, Business intelligence

What we can do together:

- **Joint programs, projects, modules, courses to launch**
- **Hardware and software upgrade**
- **Premises renovation**

International Cooperation

Joint-study programs, Erasmus+ and domestic programs, student and teacher internships, education and research projects in ICT:

- Alpen-Adria-Universität (**Austria**)
- Bratislava University of Economics and Management (**Slovakia**)
- Hamburg University of Technology (**Germany**)
- Kaunas University of Technology (**Lithuania**)
- RWTH Aachen University (**Germany**)
- Université Lumière Lyon 2 (**France**)
- University of Maribor (**Slovenia**)
- University of Paris 13 (**France**)

Our Proposals

Areas of R&D cooperation:

- Collecting, processing and analyzing information from open sources
- Agent-oriented software development
- Processing of weak-structured textual data
- Software engineering process improvement
- Dynamic systems management under uncertain conditions

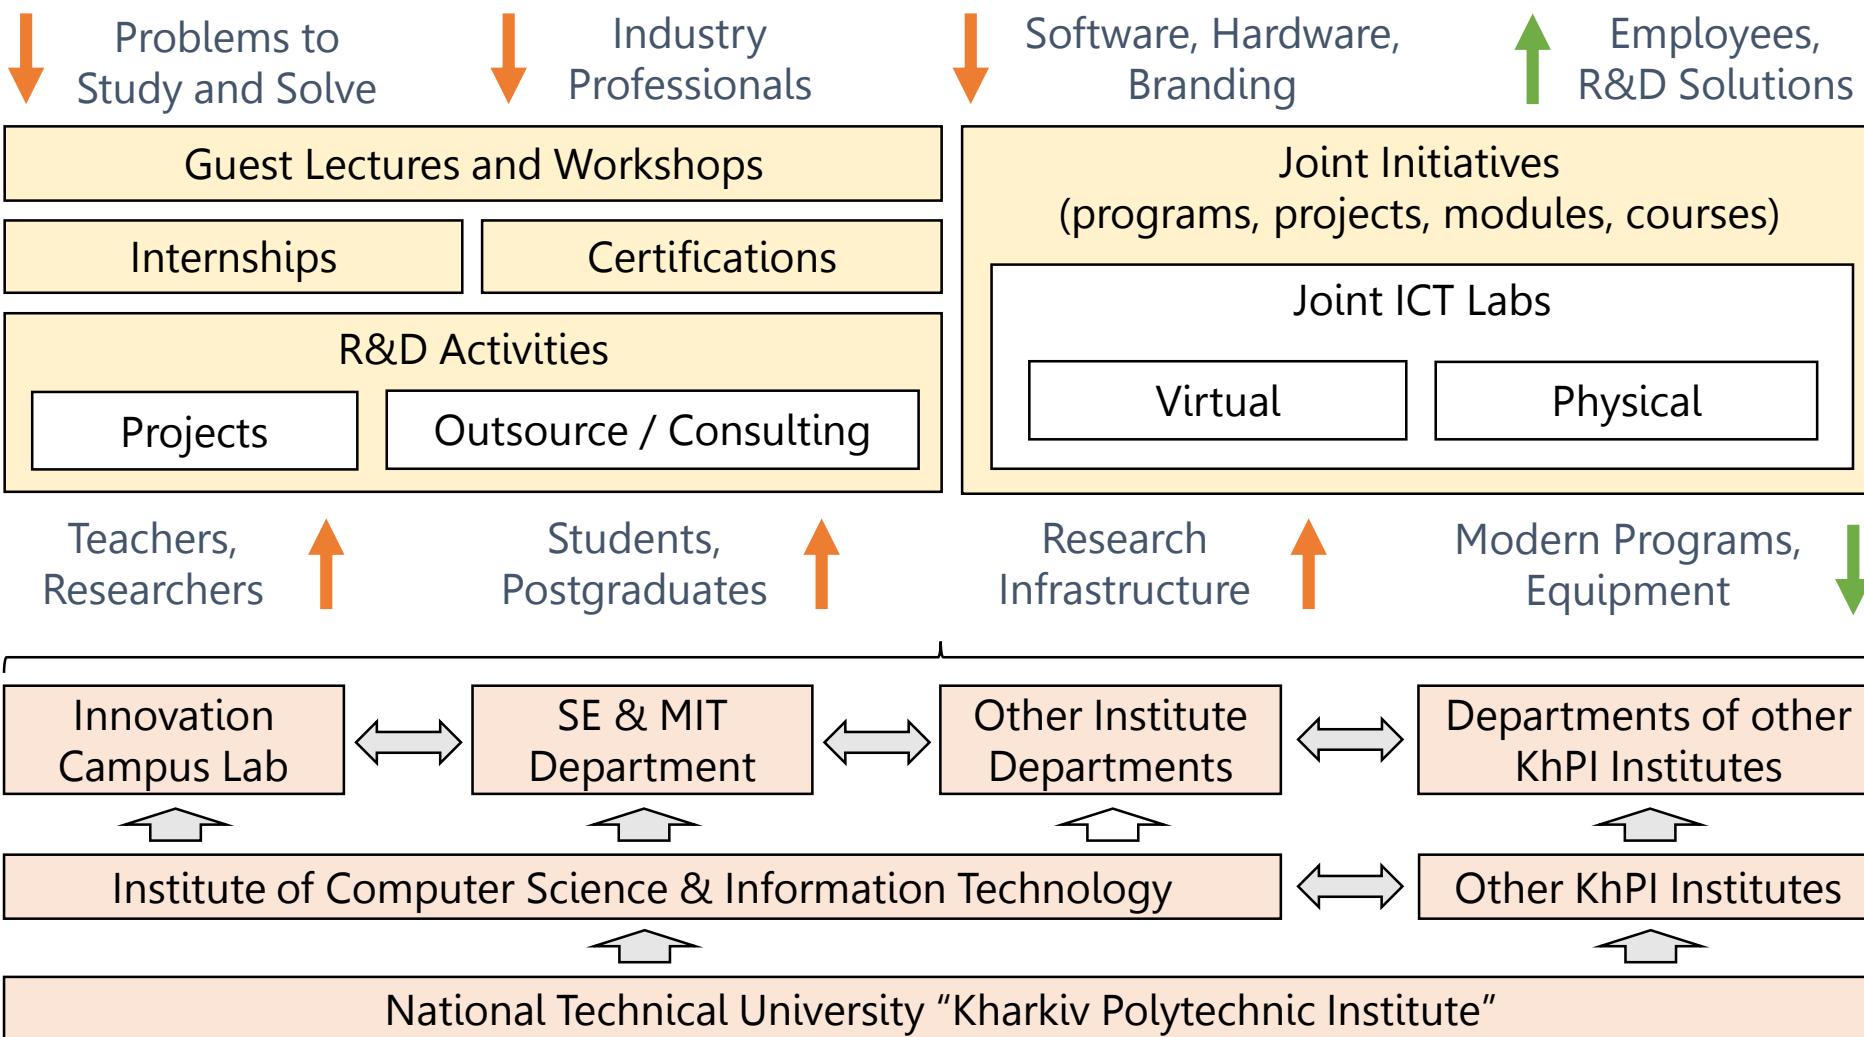

What we can do together:

- Guest lectures and workshops
- Study programs, courses validation and certification
- Joint programs, modules, projects, courses
- Students and teachers internships and certifications
- Hardware and software upgrade
