Self-study

The course involves the implementation of an individual calculation task on the topic: "Analysis of the intellectual activity of an industrial enterprise". The main task of the course is the systematization of information related to certain aspects of intellectual property. At the same time, the main stages of classical marketing are taken as a basis, filled with new content that takes into account the specifics of intellectual property objects - a new type of goods and services. This will allow the future specialist to approach the solution of practical problems from a single point of view. As a result of studying this discipline, the student should know the basics of intellectual property marketing, ensuring the competitiveness of technologies and innovative products, marketing research methods. He must be able to: collect and analyze marketing information, research the target markets of innovative and intelligent products, conduct an economic evaluation of innovative solutions, forecast the development of new technologies.
