I. Organisation information

Organisation and acronym - Telebid Pro Ltd. / TelebidPro
Type of organisation - SME (11-50)
URL - www.telebid-pro.com
Description of the organisation: TelebidPro is a software company specialized for development and implementation of demanding business web and cloud applications. The company implements fast to market enterprise solutions to customers, by enabling high technologies, automation, monitoring, document management and reporting for efficient decision-making. Over the last 10 years we have completed many projects for business applications and integration of heterogeneous systems for medium and small companies - broadcasters, financial agencies, gaming providers, payment institutions and others. We have joined together our advanced knowledge of large scale, distributed, virtual and cloud, Linux based server technologies and web technologies along with rich enterprise experiences into our main technology stack that enables our developers and DevOps to reach a significant productivity increase and deliver high performance solutions.
Description of the research group: The team of the company includes a permanent staff of 21 employees – experts in IT industry, social sciences and information services. The team members cover a broad spectrum of applied researches and technologies in various aspects of IST. The key persons have economic background and long time experience in project management. The company supports a workgroup of experts comprising academics, scientific & educational researchers from a number of Bulgarian universities and research institutes.
