

Dear Colleagues and Participants,

It is our pleasure and privilege to invite you to join the **2nd Universal Scientific Education and Research Network (USERN) Congress and the Festival for awarding the USERN Prize**, which will be held in Kharkiv, Ukraine on 8-10 November 2017.

The USERN has been established with main purpose of peaceful and humanitarian promotion of education and research, universally. It comprises of top 1% scientists in all scientific fields as the advisory board members who would manage and supervise the educational and research programs in their field of specialty. There are more than 200 top scientists, including fourteen Nobel/Abel Laureates, among the advisory board member of USERN.

The theme of the Congress will be "Science without borders", emphasizing important role of multidisciplinary studies without geographical borders! Therefore different aspects of science have been covered in the scientific program, which would be presented by top scientists worldwide. It should be mentioned that the USERN congress in 2016 was an unique event, where more than 1200 junior scientists attended the congress in Tehran, Iran. The program committee was a fabulous program on 1st day of the congress, ranging from the infinity in the universe to infinity inside body, covering the subjects on conception, evolution, and voyage to a new home in the universe, climate change and global warming, earth, the origins of the genes, and regenerative medicine and genetic engineering. The 2nd day focused on development of sciences in different fields from the past to the future. In addition to presentation on recent advances on sciences, big data and strategic planning were also discussed. The 3rd day of the congress was dedicated to different dimensions of human, where keynote lectures on physical, mental, emotional, social, and spiritual aspects of human were presented. In addition to keynote lectures, there were specific parallel focus discussion sections, where only few delegates were allowed to attend, based on their field of interest and the time of registration. These sessions were also moderated by top scientists in a friendly room, which allowed closely discussion of delegates with top scientists.

Kharkiv National Medical University with the assistance of Kharkiv University Consortium is honored to provide the Festival for all the participants to foster international dissemination of innovative researches and to exchange experiences.

The Congress's theme is holding meetings and discussion sessions on different scientific fields: medical, social, formal, biochemical and physical sciences.

Kharkiv has a special charm due to its unique cultural atmosphere. It is the city with beautiful centuries-old traditions and rich cultural life.

We are confident that the USERN Congress 2017 will represent for all participants an unforgettable personal and professional experience. Please mark in your calendars the dates of the USERN2017, November 8-10, 2017; so, that you may join your colleagues in what we hope will be a fantastic congress. We warmly welcome all of you and wish you fruitful discussions and pleasant stay in beautiful city of Kharkiv!

Yours sincerely,

Vladimir Lesovoy, Professor
Rector of Kharkiv National Medical University

Nima Rezaei, MD, PhD
Founding President of USERN
