CRDFGLOBAL

TRAINING COURSE ON THE BASICS OF CYBERHYGIENE "BASIC SAFETY RULES IN THE DIGITAL ENVIRONMENT"

COURSE CONTENT: Cybersecurity is an essential part of the daily lives of not only businesses, ministries and the state, but also ordinary users of the Internet and devices connected to it. It covers everything related to the protection of personal information, intellectual property, data, and government and industry information systems from theft and damage. Cyberhygiene is the basic rules of digital (cyber) security when working on the Internet. Due to the massive increase in the number of Internet frauds, cyberhygiene has become a hot topic of discussion in society in recent years. The course will help You to learn about the main threats in the digital space, understand what information is the main target of hackers and remember the basic recommendations for protecting Your data, safe use of electronic devices and information resources.

FOR WHOM THIS COURSE IS: This course is designed for students and all those whose daily lives do not do without computers, smartphones and tablets.

REGISTRATION AND TRAINING:
- Registration for the course - on the site https://cybereducation.org/
- The course is completely free and does not require prior technical training / knowledge of digital security

COURSE STRUCTURE:
- The course consists of 11 educational animated video modules (5-7 minutes each) and lasts 60 minutes
- Students have the opportunity to study the course modularly and record the result for each module

HOW TO GET A CERTIFICATE:
- To obtain a personal certificate, You must pass all modules of the course and pass the final test

COURSE TOPICS:
- During the course, students will be able to learn the basic rules of information protection on mobile phones, computers and social networks, identify fake news and common mistakes of users, and learn what to do to prevent the influence of cyber fraud

NOTICE : The course is open for registration and training on the platform https://cybereducation.org/ for current students and future entrants of the **National Technical University "Kharkiv Polytechnic Institute"**, which is a partner of the CRDF Global Cyber Security Project in Ukraine.

For detailed information on the conditions and dates of the course, contact the coordinator from the university:
