**Iryna Serdiuk**

iryna.serdiuk@kphi.edu.ua

Associate professor of the Department of Computer Mathematics and Data Analysis

Work experience - more than 25 years. The author of many scientific, educational, and methodological works. Leading lecturer in the courses: "Linear Algebra", "Functional Analysis", "Analytic Geometry", etc.

[More about the lecturer on the department's website](http://web.kpi.kharkov.ua/kmmm/uk)

General information

Summary

The educational discipline "Analytic Geometry" is one of the fundamental disciplines in the preparation of bachelors under the educational program "Intellectual data analysis". The discipline is aimed at mastering the theoretical foundations of Analytic Geometry. The course covers the basic concepts of vectors algebra: vector, linear dependence of vectors, Basis of vector space, Multiplication of vectors; analytic geometry: Straight line in plane and in space, Second degree curves, space. The knowledge that the student should acquire as a result of studying this course will play an important role in the process of his further education; they lay the foundations for studying other general theoretical and special disciplines.

Course objectives and goals

The purpose of studying the discipline is for the student to master the principles of modern geometry, understand its place in the general system of mathematical knowledge, and be able to apply the acquired knowledge in practice. Formation of students' basic theoretical knowledge and practical problem-solving skills.

To develop in students the skills of mathematical research of applied questions and the ability to reduce the problem to mathematical models of the theory of Analytic Geometry.

Format of classes

Lectures, practical classes, consultations, distance and blended learning in the Office 365 system, self-study. Final control in the form of an exam.

Competencies

GC 1. Ability to learn and master modern knowledge.

GC 2. Ability to apply knowledge in practical situations.

GC 3. Ability to generate new ideas (creativity).

GC 4. Ability to be critical and self-critical.

GC 6. Capability of abstract thinking, analysis and synthesis.

GC 7. Ability to search, process and analyse information from various sources.

GC 12. Determination and perseverance in relation to tasks and responsibilities.

GC 13. Skills of interpersonal interaction.

GC 14. The ability to exercise their rights and responsibilities as a member of society, to realize the values of civil (free democratic) society and the need for its sustainable development, the rule of law, human and civil rights and freedoms in Ukraine.

GC 15. The ability to preserve and enhance moral, cultural, scientific values and achievements of society based on an understanding of the history and patterns of development of the subject area, its place in the general system of knowledge about nature and society and in the development of society, technique and technology, to use various types and forms of physical activity for active recreation and healthy lifestyle.

Learning outcomes

LO 1. Demonstrate knowledge and understanding of basic concepts, principles, theories of applied mathematics and use them on practice.

LO 2. To know the basic principles and methods of mathematical, complex and functional analysis, linear algebra and theory numbers, analytic geometry, theory of differential equations, in particular partial differential equations, probability theory, mathematical statistics and random processes, and numerical methods.

LO 14. Demonstrate the ability to self-learn and continue professional development.

LO 15. Be able to organize your own activities and get results within a limited time frame.

LO 16. Demonstrate skills of interaction with other people, ability to work in a team.

LO 17. To be able to collect, process, analyse, systematize scientific and technical information, while avoiding academic dishonesty.

LO 19. Gather and interpret relevant data and analyse complexities within their area of specialization to make judgments that reflect relevant social and ethical issues.

LO 20. Demonstrate professional communication skills, including oral and written communication in Ukrainian and at least one of the official EU languages.

Student workload

The total volume of the course is 150 hours (5 ECTS credits): lectures - 32 hours, practical classes - 42 hours, self-study - 76 hours.

Course prerequisites

Students must possess the basics of mathematical knowledge obtained earlier at school or other educational institutions .

Features of the course, teaching and learning methods, and technologies

When teaching this discipline, such teaching and learning methods as gamification and peer-to-peer are used. LMS (learning management systems) systems are used in the learning process.

Program of the course

Topics of the lectures

- Topic 1. Affine and Cartesian coordinate systems
- Topic 2. Polar system of coordinates in plane
- Topic 3. Straight line in plane. Mutual positions of straight lines. Angle between straight lines in plane. Distance from a point to a straight line
- Topic 4. Second degree curves
- Topic 5. Plane
- Topic 6. Straight line in space
- Topic 7. Vectors, linear operations on vectors. Vector space and its basis. Linear dependence of vectors. Basis of vector space
- Topic 8. Multiplication of vectors
- Topic 9. Properties of determinants. Methods of calculation of n -th order determinants
- Topic 10. Matrices. Matrix addition and scalar multiplication. Matrix multiplication
- Topic 11. Invertible matrices. Simplest matrix equations
- Topic 12. Rank of matrix. Algorithm of finding the range of matrix
- Topic 13. System of linear equations
- Topic 14. Matrix way of solving systems of linear equations. Cramer method. Gauss method
- Topic 15. Systems of linear homogeneous equations
- Topic 16. Solution sets of linear systems

Topics of the practical classes

- Topic 1. Cartesian coordinate systems
- Topic 2. Polar system of coordinates in plane
- Topic 3. Straight line in plane
- Topic 4. Straight line and circle in plane
- Topic 5. Second degree curves: Ellipse, Hyperbola, Parabola
- Topic 6. Plane
- Topic 7. Straight line in space
- Topic 8. Modular control work: " Analytic Geometry "
- Topic 9. Vectors, linear operations on vectors
- Topic 10. Scalar product
- Topic 11. Vector product. Mixed product
- Topic 12. Modular control work: " Vectors "
- Topic 13. Determinants
- Topic 14. Matrix addition and scalar multiplication. Matrix multiplication. Invertible matrices
- Topic 15. Matrix equations
- Topic 16. Matrix way of solving systems of linear equations. Cramer method
- Topic 17. Gauss method
- Topic 18. Systems of linear homogeneous equations
- Topic 19. System of linear equations
- Topic 20. Groups. Rings, integral domains and fields. Modules
- Topic 21. Modular control work: " Linear algebra "

Topics of the workshops

Workshops are not provided within the discipline.

Topics of the laboratory classes

Workshops are not provided within the discipline .

Self-study

The course involves the completion of individual tasks, the results of which are monitored and assessed by teachers. Students are also recommended additional materials (videos, articles) for self-study.

Course materials and recommended reading

1. Вища математика : навч. посібник : у 2 ч. / О. П. Олійник, Н. П. Тупко, О. М. Гришко, В. О. Варивода. – Ч. 1. – К. : НАУ, 2021. – 217 с.
<https://er.nau.edu.ua/handle/NAU/58038>
2. Вища математика [Електронний ресурс] : підручник для здобувачів ступеня бакалавра за інженерними спеціальностями / М. Є. Дудкін, О. Ю. Дюженкова, І. В. Степахно ; КПІ ім. Ігоря Сікорського. – Електронні текстові дані (1 файл: 10,96 Мбайт). – Київ : КПІ ім. Ігоря Сікорського, 2022. – 449 с. – Назва з екрана.
<https://ela.kpi.ua/handle/123456789/51064>
3. Вища математика. Аналітична геометрія та лінійна алгебра. Елементи векторної алгебри. Конспект лекцій [Електронний ресурс] : навч. посіб. для студ. спеціальності 151 «Автоматизація та комп'ютерно-інтегровані технології» / О. В. Кузьма, О. В. Суліма, Т. О. Рудик, Н. П. Селезньова, Н. М. Назаренко ; КПІ ім. Ігоря Сікорського. – Електронні текстові дані (1 файл: 1,52 Мбайт). – Київ : КПІ ім. Ігоря Сікорського, 2021. – 128 с. – Назва з екрана. <https://ela.kpi.ua/handle/123456789/42310>
4. Практикум з курсу "Алгебра і геометрія". Визначники та матриці. Системи лінійних алгебраїчних рівнянь : навч.-метод. посібник / І. В. Сердюк [та ін.] ; Нац. техн. ун-т "Харків. політехн. ін-т". – Харків : НТМТ, 2022. – 112 с.
<https://repository.kpi.kharkov.ua/handle/KhPI-Press/64558>
5. Практикум з курсу "Алгебра і геометрія". Векторна алгебра : навч.-метод. посібник / І. В. Сердюк [та ін.] ; Нац. техн. ун-т "Харків. політехн. ін-т". – Харків : НТМТ, 2022. – 88 с.
<https://repository.kpi.kharkov.ua/handle/KhPI-Press/64560>
6. Практикум з курсу "Алгебра і геометрія". Аналітична геометрія : навч.-метод. посібник / І. В. Сердюк [та ін.] ; Нац. техн. ун-т "Харків. політехн. ін-т". – Харків : НТМТ, 2022. – 160 с.
<https://repository.kpi.kharkov.ua/handle/KhPI-Press/64561>
7. Корніль Т. Л. Вища математика у прикладах і задачах : навч.-метод. посібник : у 2-х ч. Ч. 1. Елементи лінійної алгебри. Аналітична геометрія на площині / Т. Л. Корніль, Г. О. Голотайстрова, С. Є. Гардер ; Нац. техн. ун-т "Харків. політехн. ін-т". – Харків : Мадрид, 2020. – 80 с.

9. Lay, David C. Linear algebra and its applications/ David C. Lay, University of Maryland, College Park, Steven R. Lay, Lee University, Judi J. McDonald, Washington State University. - Pearson Education, 2016. - 580 p. ISBN 978-0-321-98238-4

Assessment and grading

Criteria for assessment of student performance, and the final score structure

Description of the final score structure, course requirements, and necessary steps to earn points, especially paying attention to self-study and individual assignments.

Grading scale

Total points	National	ECTS
90-100	Excellent	A
82-89	Good	B
75-81	Good	C
64-74	Satisfactory	D
60-63	Satisfactory	E
35-59	Unsatisfactory (requires additional learning)	FX
1-34	Unsatisfactory (requires repetition of the course)	F

Norms of academic integrity and course policy

The student must adhere to the Code of Ethics of Academic Relations and Integrity of NTU "KhPI": to demonstrate discipline, good manners, kindness, honesty, and responsibility. Conflict situations should be openly discussed in academic groups with a lecturer, and if it is impossible to resolve the conflict, they should be brought to the attention of the Institute's management.

Regulatory and legal documents related to the implementation of the principles of academic integrity at NTU "KhPI" are available on the website: <http://blogs.kpi.kharkov.ua/v2/nv/akademichna-dobrochesnist/>
